OPERA AMUSEMENT

How it works

Learn how Opera Amusement helps you to improve your preventive maintenance in 5 simple steps:

1 – **PLAN** the activities that have to be done for each amusement ride

2 – **ASSIGN** the activities to a team or to an operator

3 – **EXECUTE** planned activities following checklists and procedures

4 – **VERIFY** in real time the progress of the works

5 – **REPORT** automatically to the Logbook in compliance with EN

Opera Amusement helps you to manage also business assets as indoor parks, water parks, zoos, restaurants and shops.

Opera Amusement allows to keep under control your ride maintenance and print automatic (device) log book

Benefits

Thanks to these features you will simplify the way you create your activity with your team. Finally all information of your amusement rides (and other business assets) are always available to all persons of your team. Managers can review on-line performances and details of each activity wherever they are in a very simple way. Thanks to Opera Amusement you integrate maintenance activity in a defined process transparent and understandable for directors.
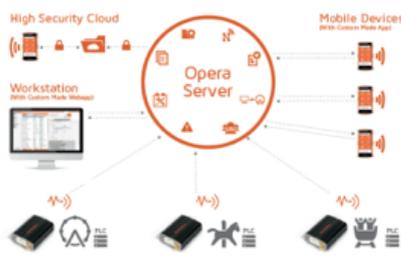

PAPERLESS WORK: *Optimize your work by reducing useless papers. Thanks to Opera Amusement all information are permanently recorded in the system and you can share with others without printing it.*

LOGBOOK ALWAYS UPDATED: *Get an automatic updated logbook in PDF in compliance with EN-13814 standard, completed with all notes and photos made by your technicians, including the name of the person in charge, date and time.*

WHO MADE IT AND WHEN: *All users are identified by their user name and password, so you know who made any activity and when he made it. All photos added to tasks are completed with user name, date, time and GPS position.*

Opera Amusement is a software operated by Remorides Srl (Italy)

www.remorides.com

Headquarter - Remorides Srl (Italy) at: sales@remorides.com

European Agent - Fabbri Rides (Italy) at info@fabbrirides.com

Main Features

Key points of Opera Amusement is a unique software networked with mobile devices and with a desktop page available through a normal web browser. Some of the features and options will be available depends on the package you will selected.
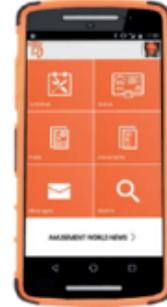

ACTIVITIES: *Plan, assign and execute any checklist thanks to the maintenance management system. All activities are tracked and stored in a cloud database. Your team will always know what to do and when to do, and managers will always know what his team has done.*

DOCUMENTS: *Load in the system and view from your mobile device any kind of file like documents, photos, video clips, audio memo, text and DWG drawing. Your technicians will have all necessary information always available with them, like amusement ride operational instruction manuals, attachments and memos about solution of previous problems solved.*

SPARE PARTS: *Spare parts of your amusement rides can be loaded in the system and available to your technicians on their mobile devices. It will be easier to identify the right part to be ordered in a common list. For advanced organization Opera Amusement System can be connected to your administrative software (with specific interface API) and help you to manage stock in real time.*

MESSAGES: *Opera Amusement supports a private messages system that allows communication between users with immediate notification (push notification). In addition to this, a special forum chat is available, that helps to share all opinions of your team by different subjects, or to create a new subject when necessary. Your team will learn and share experience between each other in an easy way.*

STATUS: *Thanks to advanced tools developed by Opera Amusement - Remorides, any switch or sensor of your amusement ride can be connected in real time with the system and monitored on the mobile device or on your computer's desktop. It will be easy to view activities and if any equipment or component is stopped or running, ON or OFF, to detect alarms or to simply check the number of passengers managed in the day. These tools will help you to manage an advanced preventive maintenance or to manage a predictive maintenance.*

WORK OFF-LINE: *To help you to use Opera Amusement even when you are out of range from any wireless connections. Our advanced Off-Line system allows you to download in the mobile device any documents or information that you need for your activity and to synchronize all data when you're back in office. Your technicians will experience no discontinuity in their works.*

Services / Other

Opera Amusement has different options to provide specific services to customers. We continuously upgrade our software to improve experience of our customers.

Rides check made easy
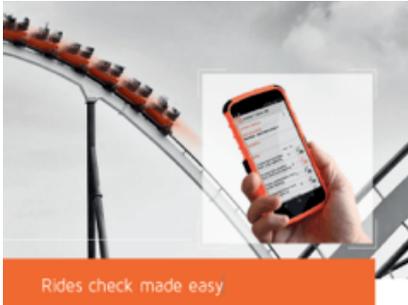

IN CLOUD: *Your data will be stored in a safe Cloud and always available for you thanks to internet connection. Our team will take care of the centralized storage thanks to the advanced technology and updated software. For special projects Opera Amusement can be also installed in a private local server, where customer dedicated IT person can take care of any software update and storage.*

DATA ENTRY: *If you have many documents related to your amusement rides and you need help to upload all of them in the system, we can help you. We need to get all these documents and your checklists in files and we will take care to upload them in Opera Amusement. Thanks to this service we help you to get Opera with turnkey.*

SIGN WITH YOUR FINGER: *Let your team sign to approve his activity or task executed. Our system allows users to simply sign on the mobile screen by using his finger.*

CREATE A TICKET: *If you have a new specific work that has to be done, just open a new "Ticket" of the task on your mobile device (or by the desktop page) and review it once it will be solved.*

APPROVAL / REVISION: *If you have many attractions or assets, or you have more that one amusement park to manage, the Approval / Revision management can help you. You will determinate which managers has to review and approve any of the scheduled activities, in this way you are sure that designated persons are informed and thus responsible.*

MULTIPLE LOCATIONS: *If your company has different amusement parks to manage, you need a special tool that allows you to get a specific overlook of each amusement park and a global overlook of all of them.*

OPENING CALENDAR: *If your amusement park has a seasonal (or part time in a week) operation then you can schedule some or all of your checklist only in that dates.*

DASHBOARD: *Summarize key points of activities on a clear dashboard, updated in real time.*

ASSET MONITOR: *Opera Amusement continuously update special tools that allows you to connect your amusement rides (or any of your equipment or assets) to the system. Modbus, Remobox and PLC Telemetry are the perfect solutions for any of your needs. Now you can plan advanced maintenance and get advanced feed back for your amusement ride to ensure that they will be always in operation at the right moment.*

TRAINING: *Your time is important for us and we can plan a complete turnkey solution for our customers. When your data is loaded in the system we are ready to support you in the start-up with proper training on site. After delivery we continue to support and help you to solve any specific issue and design any special optional that you may need.*
